When You Wear a Tailor Made Suit

There is a peculiar distinction in the fit and workmanship which puts it in a class by itself, and the wearer in a class by himself, with other tailor garbed men.

When we make it your suit is made to fit you, and not a wooden dummy. No two forms are exactly alike, hence no suit patterned after a dummy will give you an exact fit, such as you get when we take your individual measurements.

FURTHER GLOOM FOR THE BOYS AND GIRLS

Superintendent Bailey to Open Office To Meet New Pupils—Only One Class of Beginners This Year.

This information will almost seem criminal in its nature to the average boy who is following the trout stream or the girl who is making doll parties in the back yard, but in spite of this it must be announced that school will begin Monday, September 4th, and to the parents there are several items of interest.

In the first place the superintendent's office will be open the coming week each day, from Monday, Aug. 27 to Saturday, Sept. 2. Superintendent E. G. Bailey, will be there for the purpose of meeting and placing in the proper grades all the strangers who expect to start their children this coming year. This is of special importance.

In the second place, there will only be one class of youngsters permitted to enter school this year, and for this reason it would seem very essential that each parent who has a child six years of age or one who will be six by the first day of next January start them to school on September 4. None will be accepted in this class later than the first Monday following fair week.

The people are pretty well acquainted with the work of our public school by this time and it can be readily assumed that its good reputation will be upheld during the coming year. In the grades each teacher has been tried out here, but in the high school there will be several new ones for the boys and girls to become acquainted with and get used to. The following composes the faculty:

- First grade, Olive Clement and Luella Callin.
 - Second grade, Edith Bailey and Cora McNulty.
 - Third grade, Ruth Purcell and Edna Boydell.
 - Fourth grade, Emma McGivern.
 - Fifth grade, Mat Platt and Twila Head.
 - Sixth grade, Jennie Whittaker.
 - Seventh grade, F. J. Clemo and Luce B. Fox.
 - Eighth grade, Edna Griffin and Nellie Platt.
 - Science, Everett Trousdale.
 - English, G. F. Davis.
 - Business, D. A. Hiles.
 - History and mathematics, L. L. Culbertson.
 - Pedagogy, E. G. Bailey.
 - D. S. and D. A., Leona Rader.
- The new features of the coming school year will be a regular course in music in the high school, with the supervision of music and penmanship in the grades. It goes without saying that athletics will be a very prominent feature of the high school will be a very prominent feature of the high school this year under the supervision of L. L. Culbertson, and for this reason, as well as the very essential reasons of getting started right, every boy and girl of school age should be in their seats on Monday morning September 4th.

EAST IS ENJOYING WAR PROSPERITY

(Continued from page one)
as indicated by the crowded theatres and amusement places where the people are spending money lavishly, the middle west is suffering from short crops. In the Dakotas and parts of Minnesota the wheat crop is so small that the farmers in sections are burning up the wheat as it stands and turning it under.

There is this, however, that

where the farmers can afford to harvest even the short crop they are getting fabulous prices. Cash wheat in Minneapolis while I was there was \$1.53 while September futures brought \$1.52 and December deliveries almost as much.

"I was interested in the work of congress while in Washington. It really is a shame the way in which congress is delaying action, as indicated by a visit in both law making branches.

"One of the things, however, that impressed me was the standing of Representative N. J. Sinnott, whose jack rabbit hat has brought fame to eastern Oregon. It is not an exaggeration to say that Mr. Sinnott is doing more for eastern Oregon than any man in recent years. I saw his famous hat and he is as proud of it as a boy with a new top, and it looks good too, as good as any high priced bonnet I have ever seen.

"While in Washington I endeavored to learn whether or not there would be any possibility of securing government aid for the Warm Springs project, but on every hand was informed that at the present time there are no funds for irrigation work, not to mention the likelihood that there will be any in the near future."

Mr. Swagier returned at this time to proceed with his campaign for the office of district attorney.

DRILL ARTESIAN WELLS IN HARNEY

Solution of Water Problem for Vast Region Predicted by Phenomenal Success of I. N. Huguet.

After years of effort to solve the water problem on the high lands near Harney lake, where stream irrigation is out of the question, it is believed a method has been found thru the discovery of artesian wells says the Harney County News.

The honor for the discovery goes to I. N. Huguet, a pioneer stockman of that region, concerning whose wells the News has this to say

He secured the services of Mr. T. A. King, a practical well driller and who had a good machine for the purpose, and Mr. King went to work at drilling a six-inch hole. Upon reaching a depth of about sixty feet on the first well he observed a strong artesian indication in the well, and with this object then in view he turned his attention and efforts toward its development with the result of securing a good artesian flow. In all he sunk four wells, obtaining an artesian flow in each, and in the last one the water was forced thru a six-inch pipe to a height of over six feet above the ground. The pressure of water in this well was so great it forced up on the outside of the short piece of casing put in, so Mr. King was compelled to quickly draw the pipe to avoid losing it. This well is now flowing a good, strong stream of water through a ten or twelve inch opening.

Mr. Huguet's ranch is situated a short distance from Harney lake, on the southwest side, and the discovery of this vast subterranean flow of water has created no little excitement in that section, as well as in this city.

WANTS AN EFFECTIVE SYSTEM OF RURAL CREDITS.

We propose to promote by every practicable means our agricultural interests, and we include in this program an effective system of rural credits. We favor the wise conservation of our natural resources. We desire not only that they shall be safeguarded, but that they shall be adequately developed and used to the utmost public advantage.—Mr. Hughes' Speech of Acceptance.

MASS OF EXHIBITS FOR COUNTY FAIR

Several communities have already made arrangements to bring in exhibits to the county fair, and several others have signified that they will be on hand if possible with large exhibits.

The Riverside grange, located on Dead Ox flat, has made all its arrangements to send in a big display of the products of their favored section, and they have a fine lot of grains, corn, alfalfa and vegetables to select from. It will be remembered that last year Dead Ox flat sent in a fine exhibit; but it must be remembered that this is the newest section in the county and that one year has worked wonders in the way of improvement. There will also be many fine individual exhibits from this section that will open the eyes of all that attend the fair. Dead Ox flat is rapidly coming to the front.

Brogan is also coming in with a whirl this year. The fruit trees in that section are breaking under their loads of pears, peaches and apples. Several have informed me that they will bring in such large exhibits of fruit, alfalfa and other products that all who view it will want to live in the Brogan country. Brogan has ever reason to be proud of its country this year.

The business men and farmers of Nyssa are another group that are running over with enthusiasm. They threaten to bring in an exhibit that will fill the entire exhibit hall. They could do it too, for Nyssa is noted for its good farmers and public spirited citizens. The crops in this section are also unusually good this year even with the short fruit crop.

The people of Big Bend have won the reputation of always being on the ground floor. They have the stuff to make a good exhibit every year, and this year the corn is so high in that section that it resembles a tim-

bered country. Oats have been threshing higher than one hundred bushels per acre of forty pound oats, while the wheat crop is equally as good in comparison. Every one is happy prosperous and say that they are determined to cap all other communities. This is an open challenge, and so let all other communities spur the harder.

Vale is feeling good this year over the development that is certain to be caused by the Warm Springs project. Mr. Trow, president of the county fair, worked hard for this project, and Vale is slow to turn down a friend. Every one will welcome an exhibit from Vale, for it is certain to be a good one.

Let every one boost for our county fair with the same spirit as the above communities. Be loyal to your community and loyal to your county. For get any little personal differences that you may have and go to work to show the good possibilities of your section. Save these exhibits for the county fair, and then save the price for the families admission tickets.

W. W. HOWARD,
County Agricultural Agent.

PERFECT PLANS FOR WATER

(Continued from page one)

900 acres of bench lands under the project.

Succor Creek District.
Next Tuesday there will be held a special election for the purpose of organizing what is known as the Succor creek irrigation district, comprising 5000 acres of very fertile land in the Big Bend, Ore., section. This district is to be developed jointly with the Succor creek irrigation district that adjoins it in Idaho.

SOLD BY
Everhart Drug Co., Ontario

P. A. puts new joy into the sport of smoking!

YOU may live to be 110 and never feel old enough to vote, but it's certain-sure you'll not know the joy and contentment of a friendly old jimmy pipe or a hand rolled

cigarette unless you get on talking-terms with Prince Albert tobacco!

P. A. comes to you with a real reason for all the goodness and satisfaction it offers. It is made by a patented process that removes bite and parch! You can smoke it long and hard without a come-back! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Prince Albert affords the keenest pipe and cigarette enjoyment! And that flavor and fragrance and coolness is as good as that sounds. P. A. just answers the universal demand for tobacco without bite, parch or kick-back!

Introduction to Prince Albert isn't any harder than to walk into the nearest place that sells tobacco and ask for "a supply of P. A." You pay out a little change, to be sure, but it's the cheer-fullest investment you ever made!

Prince Albert is sold everywhere in tugsy red bags, 5c; tidy red tins, 10c; handsome pound and half-pound tin tins—and that clever crystal-glass pound humidor with sponge-moistener top that keeps the tobacco in such splendid condition.
